Re: Chief Financial Officer Announcement, Ontario Health

I am delighted to announce the appointment of **Elham Roushani** as **Chief Financial Officer** of Ontario Health, effective immediately.

Elham is a senior financial executive with over 20 years of experience in health care and the private sector. Starting in 1997, he oversaw the financial affairs at Cancer Care Ontario as their Vice President and Chief Financial Officer, overseeing an annual budget of over \$2.4-billion. In February 2019, he joined Ontario Health as Interim Financial Lead where he continued to demonstrate exceptional ability in fiscal management while overseeing the financial affairs of our overall Ontario Health network.

Elham is strategic, an effective communicator and a team builder. As Chief Financial Officer for Ontario Health, he will be responsible for building our corporate administration and financial management strategy. He also will provide strategic direction, priority setting and leadership of financial planning, controllership and corporate administration, and operational policies. In addition, he will provide expert advisory services across Ontario Health.

Elham is an Iranian-Canadian whose personal experiences in his country of birth inspired his humanitarian quests to work for equality and justice. Elham moved to Canada in 1983 after leaving Iran in 1979 at the start of the Iranian revolution, moved to United States to finish his high school education and migrated to Canada in 1983. Graduating with a BSc degree from the University of Guelph in 1986, Elham pursued his Chartered Accountancy Professional designation from the Institute of Chartered Accountants of Ontario in 1990.

Elham's appointment is the first of Ontario Health's permanent executive senior team members and I am delighted to welcome him to the team in this role. Please join me in welcoming Elham to his new executive position at Ontario Health.

We are continuing our wide-reaching search for other executive team members, starting with the corporate portfolios I shared a few weeks back.

Regards,

Matthew
