

COVID@Home Monitoring for Primary Care: Clinical Pathways and Resources

Please join us to learn best evidence and clinical pathways, gain access to resources and hear use cases

Target Audience: Primary care providers interested in using remote monitoring and best evidence to support their COVID+ patients in their home settings

**Thursday March 4th, 2021
12:00 p.m. – 1:00 p.m. (EST)**

[**REGISTER NOW**](#)

Objectives:

- Learn about best evidence to date and clinical pathways for monitoring COVID+ patients remotely
- Highlight resources available to assist primary care providers in this work
- Listen to use cases where clinical outcomes were improved through primary care monitoring of COVID+ patients

Speakers:

- Moderator: David Kaplan, Chief Clinical Quality, Clinical Institutes and Quality Programs, Ontario Health
- Dr. Dee Mangin and Dr. Cathy Risdon, McMaster University Department of Family Medicine
- Georgian Bay Family Health Team – Gaynor Edwards, RN, Clinic Director
- Marathon Family Health Team – Jodi Osborne, Physician Assistant
